Compostable and biodegradable netting

Product name

April 2011

Material

All extruded netting and Wine glass labels are made of thermoplastic compostable polymers from renewable agricultural resources, synthetic polyester and plasticizers. The feedstock for the material is free of GMO.

The biomaterial conforms to DIN EN 13432:2000-12 "products made of compostable materials" and to EC Directive 90/128/CE "relating to plastic materials and articles intended to come in contact with foodstuff".

The certificate is available as download

Ecological information

The product is fully compostable when introduced into active biological environments (composting plants). The process depends on temperature, humidity, pH and substratum activity.

Storage and handling

Store in cool, dry, well ventilated, low fire risk area, away from heat sources.
It is recommended to use the material within 6 months in order to keep its quality.
